1. Catalog Description

An introduction to the fundamental physics underlying components and devices and their application to electronics, power, and wireless. Credits: 3

2. Pre-requisites and Co-requisites

EEL 3111 Circuits I, MAC 2313 Calculus III, MAP 2302 Elementary differential equations, CHM 2045 General Chemistry I

3. Course Objectives

The objective of this course is to provide an understanding of the physics behind electrical components, systems, and applications.

4. Contribution of course to meeting ABET professional component

3 hours engineering science

5. Relationship of course to ABET program outcomes

a - an ability to apply knowledge of mathematics, science, and engineering: understanding and application of equations that describe the physics of conductors, capacitors, resistors, pn junctions, transistors, and electromagnetic waves

6. Instructors: Dr. Toshi Nishida and Dr. David Arnold

Dr. David Arnold
a) Office location: LAR 213
b) Office hours: MF 3 9:25-10:25 am or by appointment
c) Telephone: 352-392-4931
d) E-mail address: darnold@ufl.edu

Dr. Toshi Nishida
a) Office location: LAR 219
b) Office hours: MW 3 9:25-10:25 or by appointment
c) Telephone: (352) 392-6774
d) E-mail address: nishida@ufl.edu

7. Teaching Assistants:

Robert Wilkes
a) Office location: NEB 222
b) Office hours: TR 2-3pm
c) E-mail address: rawilkes@ufl.edu

8. Meeting Times

MWF 2 8:30-9:20 am

9. Meeting Location

NEB 202

10. Laboratory Schedule

None

11. Material and Supply Fees

None
12. **Textbooks and Software Required**

a) **Title:** *Note 1: No textbook exists currently, but DRAFT sections of a textbook will be provided for some topics*

b) **Author:**

c) **Publication date and edition:**

d) **ISBN number:**

Other: Analog Discovery Board (sold by National Instruments or Digilent)

13. **Recommended Reading/Videos**

Handouts, links, and other information posted on Canvas

14. **Course Outline** (approximate)

I. How do components work at a fundamental level? (~3 Weeks)
   i. How a resistor works
   ii. How a capacitor works
   iii. How an inductor works
   iv. How a transformer works

II. Application to power (~2 Weeks)
   i. How motors/generators work
   ii. Why ac 3-phase power
   iii. How is power distributed

III. How do solid-state devices work? (~3 Weeks)
   i. How a diode works
      • Examples: diode circuits, LEDs, solar cells, photo diodes, rectifier
   ii. How a MOSFET works
      • Examples: MOS inverters, CMOS circuits

IV. Application to electronics (~3 Weeks)
   i. How does an amplifier work
   ii. How does digital logic work
   iii. Why does computation take time
   iv. Why does computation consume power (and drain the battery)

V. How do radios and cellphones transmit and receive (~3 Weeks)
   i. Propagating E&M waves
   ii. Transmission of waves using an antenna (radiation from a small dipole antenna)

15. **Attendance and Expectations**

It is understood that all attendees will be focused on the lecture and will take every possible measure to minimize distractions for everyone (i.e. no newspapers, no cell phones, no electronics, no laptops, etc. unless instructed to use them for class). **Cell phones may not be used at any time.** Students who would like to take notes using an electronic device (e.g. tablet, laptop) must sit in the first row of the auditorium. **Students may not depart early from class unless approved in advance.**

There will be no class on Wednesday September 27 so that students may attend Career Showcase.

16. **Grading** – methods of evaluation
The score, S, for the course will be determined by combining the average scores, out of 100, on Daily Quizzes, Q, Homework, H, Projects, P, and Tests, T, with \( S = qQ + hH + pP + tT \) where weights q, h, p and t are determined as follows.

<table>
<thead>
<tr>
<th>Condition</th>
<th>Weight Formula</th>
<th>Maximum Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>If Q &gt; T then q = 0.10</td>
<td>Otherwise q = 0.10 + (T-Q) * 0.003</td>
<td>Maximum q = 0.2</td>
</tr>
<tr>
<td>If H &gt; T then h = 0.15</td>
<td>Otherwise h = 0.15 + (T-H) * 0.003</td>
<td>Maximum h = 0.3</td>
</tr>
<tr>
<td>If P &gt; T then p = 0.15</td>
<td>Otherwise p = 0.15 + (T-P) * 0.003</td>
<td>Maximum p = 0.3</td>
</tr>
<tr>
<td>t = 1 - q - h - i</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

a) Daily Quizzes:  
- Daily (except when class attendance exceeds 90% at the start of class—8:30am)
- At least the lowest 10% of Daily Quiz scores will be dropped

b) Homework:  
- ~8 Assignments — submitted on paper (no drops)

c) In-class/Take-home Projects:  
- ~6 Projects – submitted as PDF via Canvas (no drops)
  - Students will be assigned activities that complement and reinforce the theory taught in lecture, including measurements/experiments using a portable electrical engineering laboratory kit (Analog Discovery Board).

d) Tests: There will be two evening tests on Wednesday **October 4** and Wednesday **November 8**, both starting at 7PM, and a final exam on Wednesday **December 13** from 7:30-9:30AM.

e) Pop Quizzes: Pop quizzes can occur at any time, however, they will occur whenever the instructor deems that the class is not prepared to start on time, if any student is using a computer, cell phone, iPod, iPad, etc., reading a newspaper, socializing or otherwise being rude, disrespectful or disruptive during class.

Any student causing a pop quiz will receive a zero on the pop quiz, and any student responsible for multiple pop quizzes will, at the instructor’s discretion, receive a zero for their overall pop quiz score. Each pop quiz will count 2% of the overall score, the remaining portion of the overall score will be weighted as shown in the table below.

An overall score, OA will be tabulated for each student based on the average pop quiz score, PQ, the number of pop quizzes, N, along with the score, S, according to the formula below

\[
OA = S(1 - 0.02N) + PQ(0.02N)
\]

f) Late Submissions: Homework and Project submissions are due at beginning of class period (8:30 am) on the due date. Late assignments will receive a 20% deduction for first day late (8:30 am following business day), and an additional 30% deduction (50% total) for second day late (8:30 am following business day). No assignments accepted after 2 business days late. **LATE ASSIGNMENTS MUST BE SUBMITTED TO THE TA** (not faculty member). It is the student’s responsibility to find and deliver the late assignment to the TA.

17. **Grading Scale:**

Grading Scale: 
- ≥92.5 A, ≥90 A-, ≥87.5 B+, ≥82.5 B, ≥80 B-, ≥77.5 C+, ≥72.5 C, ≥70 C-, ≥67.5 D+, ≥62.5 D, ≥60 D-, <59 E

Examinations may be curved to an average of 75 with no score > 100.

18. **Make-up Exam Policy**

Makeup exam is contingent on appropriate justifications and legal documents (UF Dean of Students, certified physician, military active duty, judge for jury duty, etc.)

19. **Students Requiring Accommodations**

Students with disabilities requesting accommodations should first register with the Disability Resource Center (352-392-8565, [https://www.dso.ufl.edu/drc](https://www.dso.ufl.edu/drc)) by providing appropriate documentation. Once registered, students will receive an
accommodation letter which must be presented to the instructor when requesting accommodation. Students with disabilities should follow this procedure as early as possible in the semester.

20. **Course Evaluation**

Students are expected to provide feedback on the quality of instruction in this course by completing online evaluations at [https://evaluations.ufl.edu/evals](https://evaluations.ufl.edu/evals). Evaluations are typically open during the last two or three weeks of the semester, but students will be given specific times when they are open. Summary results of these assessments are available to students at [https://evaluations.ufl.edu/results/](https://evaluations.ufl.edu/results/).

21. **University Honesty Policy**

UF students are bound by The Honor Pledge which states, “We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honor and integrity by abiding by the Honor Code. On all work submitted for credit by students at the University of Florida, the following pledge is either required or implied: “On my honor, I have neither given nor received unauthorized aid in doing this assignment.” The Honor Code ([https://www.dso.ufl.edu/sccr/process/student-conduct-honor-code/](https://www.dso.ufl.edu/sccr/process/student-conduct-honor-code/)) specifies a number of behaviors that are in violation of this code and the possible sanctions. Furthermore, you are obligated to report any condition that facilitates academic misconduct to appropriate personnel. If you have any questions or concerns, please consult with the instructor or TAs in this class.

22. **Software Use**

All faculty, staff, and students of the University are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal penalties for the individual violator. Because such violations are also against University policies and rules, disciplinary action will be taken as appropriate. We, the members of the University of Florida community, pledge to uphold ourselves and our peers to the highest standards of honesty and integrity.

23. **Student Privacy**

There are federal laws protecting your privacy with regards to grades earned in courses and on individual assignments. For more information, please see: [http://registrar.ufl.edu/catalog0910/policies/regulationferpa.html](http://registrar.ufl.edu/catalog0910/policies/regulationferpa.html)

24. **Campus Resources:**

*Health and Wellness*
