Lectures will be posted here:

Lecture 1

**Course Number & Name:** EEL 4310 and EEL5322 - Digital Integrated Circuits Design

**Credits and Contact Hours:** 3 crs; 3 classes per week of 50 minutes each

**Instructor's or Course Coordinator's Name:** Dr. Scott E. Thompson

Live lecture MWF 7th period 1:55 - 2:45

Course can be completed online but attendance and participation in live lectures is encourage

Classes will generally be recorded live and posted within 1 hour. There will also be a few flipped classes.

[zoom link for all classes will be](https://ufl.zoom.us/j/7773002921) [Links to an external site.](https://ufl.zoom.us/j/7773002921)

Recorded lectures will be posted under “Zoom Conferences” and on home page

**Contact info**  
Prof. Scott Thompson  
535 Engineering Bldg  
846-0320  
Office hours: M W F 8th period days of live class  
Plus e-learning discussion board (https://lss.at.ufl.edu/)  
(plus additional office hours arranged via email thompson@ece.ufl.edu)

**Cadence TA**

**Textbook Title, Author, and Year:**

Title - Introduction to Microelectronic Fabrication *(Required)*

Author - Richard C. Jaeger

dISBN Number - 0-201-44494-7
1. Supplemental Material:

Specific Course Information

1. Catalog Description: Fabrication, Layout, Analysis and design of digital and circuits using MOS Transistors
2. Prerequisites or Co-requisites: EEL 3396, EEL 3308
3. Required, Elective, or Selected Elective (Table 5-1):

Specific Goals for the Course

1. Specific Outcomes of Instruction:

This course focuses on analysis and design of modern digital circuits. Silicon technology and transistors are introduced and described from a digital point of view, and the performance of various circuits is derived and estimated. CMOS digital circuits will be designed and analyzed. Students will have a semester long team SRAM chip design project using commercial software Cadence. Project will cover advanced topics such as manufacturing variations.

1. Explicitly indicate which of the student outcomes listed in Criterion 3 or any other outcomes are addressed by this course:

EE2, a, c, e, l, k

Topics to Be Covered

Week 1: Moore’s Law, History and Future of Computing, Chipworks tear down of a mobile computer (iPhone and iPad), Jaeger Chapter 1.

Week 2: Design rules, Chap. 2.1, 2.2 and 2.3 of Rabaey, 1.2, 1.3.1

Week 3: Contacts and Interconnects Chap. 7 Jaeger and handouts. MOS Process Integration Chap. 9 of Jaeger and State of the art CMOS planar and FinFET SOC
process flow:  28nm, 20nm, 14nm, 10nm Logic Technologies and advanced layout
issues: Optical Proximity correction and Restrictive Design Rules

Week 4-5: What is VLSI, Cadence Design Training, Statistics Review, and
Introduction to micro fabrication with emphasis on process variation Chap. 5.1, 5.2, 5.3, 5.4 of Jaeger, plus handouts and Chipworks reverse engineering reports

Week 6-7: CMOS Logic, DRAM, NAND, CMOS image sensor chips fabrication, bit cell
or pixel cell, and array architecture Chap. 8.7 of Jaeger and Chapter 2.2 Rabaey plus
handouts

Week 8-9: Layout Layers and X-sections Design Rules, Resistance, Capacitance,
MOSFET
Chap. 4.1 to 4.3 and Chap. 3.3 of Rabaey and 9.2, 9.3 Jaeger

Week 10: MOS Transistors, CMOS Inverters, Chap. 3.3 and Chap. 5 of Rabaey

Week 11: CMOS Inverters, Chap. 5 of Rabaey

Week 12: Combination Logic, Compound Gates, Chap. 6 of Rabaey

Week 13: Transmission Gates, Memory, Chap. 6 and Chap. 12 of Rabaey

Week 14: Memory, Pseudo NMOS, Pass Trans. Logic, Chap. 6 of Rabaey

Week 15: Pre-charge Logic, and Dynamic Logic, Chap. 6 of Rabaey

Week 16: Domino Logic, Logic Comparison, Noise Chap. 6 of Rabaey

- Grading:

  Class exams

  100 Points   Test 1 Friday Sept. 29
  100 Points   Test 2 Friday Oct. 20
  100 Points   Test 3 Friday Nov. 17
  200 Points   Comprehensive Final: 12/14/2024 @ 10:00 am - 12:00 PM

  Cadences assignment 1 (25 points)

  Group SRAM Design project (100 points) Final Class Project Due last day of
  class

  Homework 5 points per assignment

- Test and projects and homework different for EEL 4310 and EEL5322
- No exam make-up unless valid excuse. All valid excuses must be approved by the
  Professor
- Final Grading Scale
- A 100% to 94%, A- < 94% to 90%, B+< 90%to 87%, B< 87% to 84%
- B-< 84% to 80%, C+< 80% to 77%, C< 77% to 74%, C-< 74% to 70%
- D+< 70% to 67%, D< 67% to 64%, D-< 64% to 61%, E< 61% to 0%

- Attendance: All lecture classes will be recorded via zoom during the regularly scheduled live class and will be made available online shortly after the lecture. A zoom link will be provided before the lecture. Students are free to attend the live lecture in person, participate in the live lecture over zoom, or watch the posted lecture.
