

EE Design 1

EEL 3923C Section 11762

Class Periods: N/A, asynchronous class

Location: Design I Lab: NEB 246

Academic Term: Spring 2023

Instructors:

	Dr. Erin Patrick	Mike Stapleton
Office	NEB 229	NEB 239
Office Hours	TBA	By appointment
email	erin.patrick@ece.ufl.edu	mstap@ece.ufl.edu
phone	392-0305	392-2727

Teaching Assistant/Peer Mentor/Supervised Teaching Student:

Please contact through the Canvas website or email

- Dieter Steinhauser, dsteinhauser@ufl.edu, office hours: TBD, NEB 246
- Shane Aspenwall, shane.aspenwall@ufl.edu, office hours: TBD, NEB 246
- Design 2 TA, David Moore, david.moore1@ufl.edu, NEB 246

Course Description

Students design, produce, and report on a hardware prototype, meeting defined specifications and using a structured design methodology. Includes project management, hardware prototyping, and project reporting. Laboratory. Credits 3.

Course Pre-Requisites / Co-Requisites

EEE 3308C and EEL 3112 and EEL 3701C (with minimum grades of C) and 2 courses from breadth elective list.

Course Objectives

Students will reinforce basic circuit and digital systems analysis and techniques to implement electrical engineering projects. PCB design software will also be taught such that small PCBs can be populated and tested in the lab. At the end of the semester, a design project is assigned that uses the modules taught earlier in the semester.

Materials and Supply Fees

Lab fees (includes all components for lab modules and final project): \$142.34

Printed Circuit Board (for final project): ~\$30

Relation to Program Outcomes (ABET):

Outcome	Coverage*
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics	High
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors	Medium
3. An ability to communicate effectively with a range of audiences	

4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts	
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives	
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions	High
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies	

*Coverage is given as high, medium, or low. An empty box indicates that this outcome is not covered or assessed in the course.

Required Textbooks and Software

- Thonny (microPython IDE) Available for free at: <https://thonny.org/>
- LTSPICE IV: Available for free at <http://www.linear.com/designtools/software/>
- Altium (available with a license through UF)

Recommended Materials

- N/A

Course Schedule

We will have 8 lecture-based classes during the semester to introduce the course, every lab module, and the final project. The class will meet at 5pm in a lecture hall in NEB 202. The class will be broadcast via Zoom and a recording will be made available after the class.

There are 8 modules plus a final project listed below. Each module will have a demo and lab report associated with it. The demos will occur in the Design 1 lab with the TA or the instructor during their office hours. The report will always be due two weekdays after your module demo due date. You may demo any module or the Final Project before the final due date. The Design 1 Lab (NEB 246) is open 24/7 to any registered student in this course via UFid card entry.

1. Test and Measurement – learn how to use lab equipment (power supply, oscilloscope, multimeter, DAD network analyzer)
2. PCB Design – use Altium (an industry-standard software) to design and layout a printed circuit board
3. Power Supply Design – build an AC to DC converter and learn about voltage regulation schemes (Zener diode, LDO)
4. Microcontroller Basics – review/learn general purpose digital input/output on a microcontroller
5. Microcontroller A/D with LCD – use the internal analog to digital converter on the microcontroller and learn how to interface with an LCD screen using parallel communication
6. Microcontroller SPI to DAC – use serial communication peripheral hardware on microcontroller (SPI) to communicate to a digital-to-analog converter IC (DAC).
7. Analog/Digital Filter Design – learn three common active filter types and topologies and the issues with component tolerances when building them; also learn to implement a digital filter using a microprocessor
8. Amplifier Design – review op-amp configurations for amplification purposes and learn about IC-specific specifications for use in real-world electronic circuit applications
9. Final Project - implement a system on a PCB using analog and digital inputs and outputs (microcontroller, LCD, DAC, amplification, power regulation, PCB)

Lecture (L#) (Zoom)	Demo Due Date				
Week	M	T	W	R	F
20-Aug			L1 / Test & Meas. Module and PCB Design Module		
27-Aug			L2 / Power Supply Module	Group 1/ Test & Meas., PCB Demo	Group 2/ Test & Meas., PCB Demo
3-Sep	Holiday			L3/ Microcontroller Basics Module	
10-Sep	Group 1/ Power Supply Demo	Group 2/ Power Supply Demo		L4/ Microcontroller ADC-LCD Module	
17-Sep	Group 1/ Microcontroller Basics Demo	Group 2/ Microcontroller Basics Demo			
24-Sep			L5/ Microcontroller DAC-SPI Module	Group 1/ Microcontroller ADC-LCD Demo	Group 2/ Microcontroller ADC-LCD Demo
1-Oct				L6/ Analog Filter Module	
8-Oct	Group 1/ Microcontroller DAC-SPI Demo	Group 2/ Microcontroller DAC-SPI Demo			
15-Oct			L7/ Analog Amplifier Module	Group 1/ Filter Demo	Group 2/ Filter Demo
22-Oct				L8/ Final Project Lecture	
29-Oct	Group 1/ Amplifier Demo	Group 2/ Amplifier Demo			Final Project Proposal Due
5-Nov					Holiday
12-Nov					
19-Nov	Holiday				
26-Nov					
3-Dec			Final Project Demo Due		
10-Dec	Final Project Report Due				

Attendance Policy, Class Expectations, and Make-Up Policy

Requirements for class attendance and make-up exams, assignments, and other work in this course are consistent with university policies. Click here to read the university attendance policies:

<https://catalog.ufl.edu/UGRD/academic-regulations/attendance-policies/>

Format: The course is comprised of 8 modules and a final project. All module demos are due on an assigned day. Module lab reports are due at 11:59 PM two weekdays after the deadline for that module. The assignments and

supporting material will be available on canvas. A lecture introducing the module/final project will be held live and through Zoom on dates defined in the course schedule. Students are encouraged to attend the lecture virtually. The lecture recording will be posted on canvas.

Students must submit individual work individually on each module/final project. You are encouraged to work together and share ideas on assignments. However, you are not allowed to copy or duplicate anything, from anyone or any source. This work will be considered cheating and will be dealt with in a severe manner. See Section 19 on Honesty Policy.

Class and Laboratory etiquettes: It is understood that attendees at lectures and labs will be focused on the particular lecture or lab and will take every possible measure to minimize distractions for everyone. It is the student's responsibility to return all equipment and clean her/his work area before leaving the Lab unless the equipment is specifically checked out. In the latter case the equipment must be checked in before the end of the semester.

Evaluation of Grades

Assignment	Total Points	Percentage of Final Grade
Module Demos (8)	Pass/Fail	late or incomplete demos decrease grade
Module Reports (7)	Pass/Fail	late or incomplete reports decrease grade
Final Project	100	100%

The overall grade for the course will be based on 8 Modules and a Final Project.

Modules: The modules are pass/fail.

1. Each student will be allowed to use up to two tardy passes during the term.
 1. The use of a tardy extends the due date for that module by one week.
 2. Students may use excess tardies beyond the two tardy passes.
2. Each excess tardy will result in a reduction in the final grade for the course to the next lower grade. i.e. two excess tardies would reduce an 'A' first to an 'A-' and then to a 'B+'.
3. Students are encouraged to NOT USE THE TARDY PASSES so that they will be available if they need them later.
4. There will be a full letter grade deduction from the final grade for each module that was not fully completed. Full completion requires a pass on the demonstration AND a pass on the associated report.

Final Project:

The final project will be graded on a 100 point scale. To pass the course, the final project must be implemented on a PCB designed by each student, AND, the PCB must have been designed, and intended, to fully implement the entire functionality of the system. A final project that works properly, but meets only the minimum, will receive a score no higher than 90. The final project report also accounts for 25% of the points and will be judged based on presentation and level of understanding of the technical components of the design.

The final grade for the course will be determined by reducing the final project grade by any letter grade reductions due to failing to fully complete any of the modules and/or for the use of excess tardies.

Grading Policy

Percent	Grade	Grade Points
93.4 - 100	A	4.00
90.0 - 93.3	A-	3.67
86.7 - 89.9	B+	3.33

83.4 - 86.6	B	3.00
80.0 - 83.3	B-	2.67
76.7 - 79.9	C+	2.33
73.4 - 76.6	C	2.00
70.0 - 73.3	C-	1.67
66.7 - 69.9	D+	1.33
63.4 - 66.6	D	1.00
60.0 - 63.3	D-	0.67
0 - 59.9	E	0.00

More information on UF grading policy may be found at:

<https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx>

Students Requiring Accommodations

Students with disabilities who experience learning barriers and would like to request academic accommodations should connect with the disability Resource Center by visiting <https://disability.ufl.edu/students/get-started/>. It is important for students to share their accommodation letter with their instructor and discuss their access needs, as early as possible in the semester.

Course Evaluation

Students are expected to provide professional and respectful feedback on the quality of instruction in this course by completing course evaluations online via GatorEvals. Guidance on how to give feedback in a professional and respectful manner is available at <https://gatorevals.ua.ufl.edu/students/>. Students will be notified when the evaluation period opens, and can complete evaluations through the email they receive from GatorEvals, in their Canvas course menu under GatorEvals, or via <https://ufl.bluera.com/ufl/>. Summaries of course evaluation results are available to students at <https://gatorevals.ua.ufl.edu/public-results/>.

In-Class Recording

Students are allowed to record video or audio of class lectures. However, the purposes for which these recordings may be used are strictly controlled. The only allowable purposes are (1) for personal educational use, (2) in connection with a complaint to the university, or (3) as evidence in, or in preparation for, a criminal or civil proceeding. All other purposes are prohibited. Specifically, students may not publish recorded lectures without the written consent of the instructor.

A “class lecture” is an educational presentation intended to inform or teach enrolled students about a particular subject, including any instructor-led discussions that form part of the presentation, and delivered by any instructor hired or appointed by the University, or by a guest instructor, as part of a University of Florida course. A class lecture does not include lab sessions, student presentations, clinical presentations such as patient history, academic exercises involving solely student participation, assessments (quizzes, tests, exams), field trips, private conversations between students in the class or between a student and the faculty or lecturer during a class session.

Publication without permission of the instructor is prohibited. To “publish” means to share, transmit, circulate, distribute, or provide access to a recording, regardless of format or medium, to another person (or persons), including but not limited to another student within the same class section. Additionally, a recording, or transcript of a recording, is considered published if it is posted on or uploaded to, in whole or in part, any media platform, including but not limited to social media, book, magazine, newspaper, leaflet, or third party note/tutoring services. A student who publishes a recording without written consent may be subject to a civil cause of action instituted by a person injured by the publication and/or discipline under UF Regulation 4.040 Student Honor Code and Student Conduct Code.

University Honesty Policy

UF students are bound by The Honor Pledge which states, “We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honor and integrity by abiding by the Honor Code. On all work submitted for credit by students at the University of Florida, the following pledge is either required or implied: “On my honor, I have neither given nor received unauthorized aid in doing this assignment.” The Honor Code (<https://sccr.dso.ufl.edu/process/student-conduct-code/>) specifies a number of behaviors that are in violation of this code and the possible sanctions. Furthermore, you are obligated to report any condition that facilitates academic misconduct to appropriate personnel. If you have any questions or concerns, please consult with the instructor or TAs in this class.

Commitment to a Safe and Inclusive Learning Environment

The Herbert Wertheim College of Engineering values broad diversity within our community and is committed to individual and group empowerment, inclusion, and the elimination of discrimination. It is expected that every person in this class will treat one another with dignity and respect regardless of gender, sexuality, disability, age, socioeconomic status, ethnicity, race, and culture.

If you feel like your performance in class is being impacted by discrimination or harassment of any kind, please contact your instructor or any of the following:

- Your academic advisor or Graduate Program Coordinator
- Jennifer Nappo, Director of Human Resources, 352-392-0904, jpennacc@ufl.edu
- Curtis Taylor, Associate Dean of Student Affairs, 352-392-2177, taylor@eng.ufl.edu
- Toshikazu Nishida, Associate Dean of Academic Affairs, 352-392-0943, nishida@eng.ufl.edu

Software Use

All faculty, staff, and students of the University are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal penalties for the individual violator. Because such violations are also against University policies and rules, disciplinary action will be taken as appropriate. We, the members of the University of Florida community, pledge to uphold ourselves and our peers to the highest standards of honesty and integrity.

Student Privacy

There are federal laws protecting your privacy with regards to grades earned in courses and on individual assignments. For more information, please see: <https://registrar.ufl.edu/ferpa.html>

Campus Resources:

Health and Wellness

U Matter, We Care:

Your well-being is important to the University of Florida. The U Matter, We Care initiative is committed to creating a culture of care on our campus by encouraging members of our community to look out for one another and to reach out for help if a member of our community is in need. If you or a friend is in distress, please contact umatter@ufl.edu so that the U Matter, We Care Team can reach out to the student in distress. A nighttime and weekend crisis counselor is available by phone at 352-392-1575. The U Matter, We Care Team can help connect students to the many other helping resources available including, but not limited to, Victim Advocates, Housing staff, and the Counseling and Wellness Center. Please remember that asking for help is a sign of strength. In case of emergency, call 9-1-1.

Counseling and Wellness Center: <https://counseling.ufl.edu>, and 392-1575; and the University Police Department: 392-1111 or 9-1-1 for emergencies.

Sexual Discrimination, Harassment, Assault, or Violence

If you or a friend has been subjected to sexual discrimination, sexual harassment, sexual assault, or violence contact the **Office of Title IX Compliance**, located at Yon Hall Room 427, 1908 Stadium Road, (352) 273-1094, title-ix@ufl.edu

Sexual Assault Recovery Services (SARS)

Student Health Care Center, 392-1161.

University Police Department at 392-1111 (or 9-1-1 for emergencies), or <http://www.police.ufl.edu/>.

Academic Resources

E-learning technical support, 352-392-4357 (select option 2) or e-mail to Learning-support@ufl.edu.
