### ***Course Pre-Requisites / Co-Requisites***

- EEE-5502 Foundations of Signal Processing
- Undergraduate-level probability and statistics course
- Undergraduate-level linear algebra course
- Exposure to MATLAB programming

### ***Course Objectives***

This course introduces students to the fundamental principles and methods used for image processing and computer vision. The goal of this course is to understand how to efficiently represent, process, and analyze image signals. The objective of the course is to provide students with the scientific foundations needed to implement and apply techniques used to address image analysis related problems. Topics to be covered include: image acquisition and display using digital devices, properties of human visual perception, sampling and quantization, image enhancement, two-dimensional Fourier transforms, linear and nonlinear filtering, morphological operations, noise removal, image deblurring, edge detection, geometric transformations, segmentation, and object recognition (classification). The course objective

will be met by the completion of multiple homework assignments which require the implementation and application of image processing / computer vision methods discussed during lecture. Also, the students' understanding of the main concepts will be assessed using multiple exams.

Although attendance will not be recorded, it is expected that students attend all lectures. Excused absences are consistent with university policies in the undergraduate catalog (<https://catalog.ufl.edu/ugrad/current/regulations/info/attendance.aspx>) and require appropriate documentation.

Students are expected to take measures to minimize distractions for everyone (i.e. no newspapers, cell phone, PDA, laptops, etc. unless instructed to use them for class.

Makeup exams are contingent on appropriate justifications and legal documents (UF Dean of Students, certified physician, military active duty, judge for jury duty, etc.) Late assignments **will not** be accepted.

Once registered, students will receive an accommodation letter which must be presented to the instructor when requesting accommodation. Students with disabilities should follow this procedure as early as possible in the semester.

### ***Course Evaluation***

Students are expected to provide feedback on the quality of instruction in this course by completing online evaluations at <https://evaluations.ufl.edu/evals>. Evaluations are typically open during the last two or three weeks of the semester, but students will be given specific times when they are open. Summary results of these assessments are available to students at <https://evaluations.ufl.edu/results/>.
