Safe Autonomous Systems
EEL 6935

Class Periods: Mondays/Wednesdays/Fridays, 11:45am – 12:35pm
Location: Larsen Hall 330
Academic Term: Fall 2022

Instructor:
Ivan Ruchkin
iruchkin@ufl.edu
Office Phone Number: TBA
Office Hours: Wednesdays, 10:30am – 11:30am, office location TBA

Teaching Assistant/Peer Mentor/Supervised Teaching Student: N/A

Course Description
Mathematical and algorithmic techniques and tools for building safe autonomous systems, from unmanned drones to self-driving cars to smart grids to medical devices. The course is split into three modules:
(i) Systems: mathematical formalisms for dynamical, probabilistic, and hybrid systems;
(ii) Autonomy: data-driven components, probabilistic graphical models, neural networks, robustness and errors of learned models, learned perception and control;
(iii) Safety: logical specifications of safety properties, verification of system models and learned components, safe planning and control, temporal and confidence monitoring.

Credits: 3.

Course Pre-Requisites / Co-Requisites
Required skills: linear algebra, basic calculus, basic probability/statistics, basic control, and Boolean logic. If you are unsure about your skills in any of these areas, feel free to reach out to the instructor at iruchkin@ufl.edu with a description of your background and how this course would be useful to you.

Nice to have but not required: EEE 5544 Stochastic Methods for Engineering 1, EEE 5702 Automated Hardware/Software Verification, CAP 5635 Artificial Intelligence Concepts, EEL 5840 Fundamentals of Machine Learning.

Course Objectives
This course will teach you rigorous mathematical and algorithmic techniques for building safe autonomous systems. These techniques enable engineers to define what safety means to them, make a mathematical model of the system and its environment, analyze this model for safety, and implement the system using a combination of first-principles (e.g., logic-based synthesis) and data-driven (e.g., training neural networks) techniques.

By taking this course, you will gain
● A fundamental understanding of the theories and tools used to build safe autonomous systems, through the readings, lectures, and in-class working sessions and discussions.
● First-hand experience with safety and autonomy through an individualized course project, designed and executed under the instructor’s close supervision.

Materials and Supply Fees:
Students are expected to use a personal computer for this course.

Required Textbooks and Software
● None
**Recommended Materials**
Most course material will be based on select chapters from the following books:

Lectures will be supplemented with reading chapters from the above books and research papers as needed.

**Course Schedule**

<tr>
<td>Project presentation: clarity, timing</td>
<td>40</td>
<td>10%</td>
</tr>
<tr>
<td>Project final: soundness, clarity, outcome</td>
<td>60</td>
<td>15%</td>
</tr>
</tbody>
</table>

Class participation will be assessed based on each student's thoughtful questions, activity in working sessions, and contributions to discussions, both in-class and online.

The midterm will assess the understanding of the theoretical concepts from the first half of the course. The in-class working sessions will walk students through problems similar to those in the midterm.

Students will carry out their projects individually (i.e., no teams). A project can be an algorithm implementation, a case study in an application domain, a theoretical investigation, or a systematic review of literature identifying research opportunities in a well-defined area. Projects related to the student's current or future research are encouraged. Before writing the proposal, students should discuss their vision with the instructor.

Grading Policy

</thead>
<tbody>
<tr>
<td>90 - 100</td>
<td>A</td>
<td>4.00</td>
</tr>
<tr>
<td>80 - 89.9</td>
<td>B</td>
<td>3.00</td>
</tr>
</tbody>
</table>
Fractional grades (increases only) may be assigned at the instructor's discretion.

More information on UF grading policy may be found at: [https://gradcatalog.ufl.edu/graduate/regulations/](https://gradcatalog.ufl.edu/graduate/regulations/)

**Attendance Policy, Class Expectations, and Make-Up Policy**

Although absence from class does not necessarily equal zero participation, students are strongly encouraged to attend the classes for the sake of improved learning.

Excused absences must be consistent with university policies in the Graduate Catalog (see [https://gradcatalog.ufl.edu/graduate/](https://gradcatalog.ufl.edu/graduate/) for more information) and require appropriate documentation.

**Course Evaluation**

Students are expected to provide professional and respectful feedback on the quality of instruction in this course by completing course evaluations online via GatorEvals. Guidance on how to give feedback in a professional and respectful manner is available at [https://gatorevals.aa.ufl.edu/students/](https://gatorevals.aa.ufl.edu/students/). Students will be notified when the evaluation period opens and can complete evaluations through the email they receive from GatorEvals, in their Canvas course menu under GatorEvals, or via [https://ufl.bluera.com/ufl/](https://ufl.bluera.com/ufl/). Summaries of course evaluation results are available to students at [https://gatorevals.aa.ufl.edu/public-results/](https://gatorevals.aa.ufl.edu/public-results/).

**University Honesty Policy**

UF students are bound by The Honor Pledge which states, “We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honor and integrity by abiding by the Honor Code.” On all work submitted for credit by students at the University of Florida, the following pledge is either required or implied: “On my honor, I have neither given nor received unauthorized aid in doing this assignment.”

The Conduct Code ([https://sccr.dso.ufl.edu/process/student-conduct-code/](https://sccr.dso.ufl.edu/process/student-conduct-code/)) specifies behaviors that are in violation of this code and the possible sanctions. If you have questions or concerns, please consult the instructor.

**Commitment to a Safe and Inclusive Learning Environment**

The Herbert Wertheim College of Engineering values broad diversity within our community and is committed to individual and group empowerment, inclusion, and the elimination of discrimination. It is expected that every person in this class will treat one another with dignity and respect regardless of gender, sexuality, disability, age, socioeconomic status, ethnicity, race, and culture.

If you feel like your performance in class is being impacted by discrimination or harassment of any kind, please contact your instructor or any of the following:

- Your academic advisor or Graduate Program Coordinator
- Jennifer Nappo, Director of Human Resources, 352-392-0904, jpenacc@ufl.edu
- Curtis Taylor, Associate Dean for Student Affairs, 352-392-2177, taylor@eng.ufl.edu
- Toshikazu Nishida, Associate Dean for Academic Affairs, 352-392-0943, nishida@eng.ufl.edu

**Students Requiring Accommodations**

Students with disabilities who experience learning barriers and would like to request academic accommodations should connect with the disability Resource Center by visiting [https://disability.ufl.edu/get-started/](https://disability.ufl.edu/get-started/). It is important for students to share their accommodation letter with their instructor and discuss their access needs as early as possible in the semester.
In-Class Recording
Students are allowed to record video or audio of class lectures. However, the purposes for which these recordings may be used are strictly controlled. The only allowable purposes are (1) for personal educational use, (2) in connection with a complaint to the university, or (3) as evidence in, or in preparation for, a criminal or civil proceeding. All other purposes are prohibited. Specifically, students may not publish recorded lectures without the written consent of the instructor.

A “class lecture” is an educational presentation intended to inform or teach enrolled students about a particular subject, including any instructor-led discussions that form part of the presentation, and delivered by any instructor hired or appointed by the University, or by a guest instructor, as part of a University of Florida course. A class lecture does not include lab sessions, student presentations, clinical presentations such as patient history, academic exercises involving solely student participation, assessments (quizzes, tests, exams), field trips, private conversations between students in the class or between a student and the faculty or lecturer during a class session.

Publication without permission of the instructor is prohibited. To “publish” means to share, transmit, circulate, distribute, or provide access to a recording, regardless of format or medium, to another person (or persons), including but not limited to another student within the same class section. Additionally, a recording, or transcript of a recording, is considered published if it is posted on or uploaded to, in whole or in part, any media platform, including but not limited to social media, book, magazine, newspaper, leaflet, or third party note/tutoring services. A student who publishes a recording without written consent may be subject to a civil cause of action instituted by a person injured by the publication and/or discipline under UF Regulation 4.040 Student Honor Code and Student Conduct Code.

Software Use
All faculty, staff, and students of the University are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal penalties for the individual violator. Because such violations are also against University policies and rules, disciplinary action will be taken as appropriate. We, the members of the University of Florida community, pledge to uphold ourselves and our peers to the highest standards of honesty and integrity.

Student Privacy
There are federal laws protecting your privacy with regards to grades earned in courses and on individual assignments. For more information, please see: https://registrar.ufl.edu/ferpa.html

• Please continue to follow healthy habits, including best practices like frequent hand washing. Following these practices is our responsibility as Gators.

U Matter, We Care:
Your well-being is important to the University of Florida. The U Matter, We Care initiative is committed to creating a culture of care on our campus by encouraging members of our community to look out for one another and to reach out for help if a member of our community is in need. If you or a friend is in distress, please contact umatter@ufl.edu so that the U Matter, We Care Team can reach out to the student in distress. A nighttime and weekend crisis counselor is available by phone at 352-392-1575. The U Matter, We Care Team can help connect students to the many other helping resources available including, but not limited to, Victim Advocates, Housing staff, and the Counseling and Wellness Center. Please remember that asking for help is a sign of strength. In case of emergency, call 9-1-1.

Counseling and Wellness Center: https://counseling.ufl.edu, and 392-1575; and the University Police Department: 392-1111 or 9-1-1 for emergencies.

Sexual Discrimination, Harassment, Assault, or Violence
If you or a friend has been subjected to sexual discrimination, sexual harassment, sexual assault, or violence contact the Office of Title IX Compliance, located at Yon Hall Room 427, 1908 Stadium Road, (352) 273-1094, title-ix@ufl.edu

Sexual Assault Recovery Services (SARS)
Student Health Care Center, 392-1161.

University Police Department at 392-1111 (or 9-1-1 for emergencies), or http://www.police.ufl.edu/.
