Neural Signals, Systems and Technology
EEL 5934  Sections 066A, 2308
Class Periods: Tu 3rd period, Th 3rd and 4th
Location:  LAR 239
Academic Term:  Spring 2018

Instructor:
Dr. Karim Oweiss
Email Address: koweiss@ufl.edu
Office Phone Number: 352-294-1898
Office Hours:  Tuesdays and Thursdays 3-4 pm

Teaching Assistants:
• Seyed Mehrdad Hashemi (hashemi@ufl.edu)

Course Description
(3 credits) Biophysical principles of neural signaling, characterization of neural circuits and systems, technology design principles for interfacing with biological neural systems, overview of clinical applications and industrial opportunities for neurotechnology.

Course Pre-Requisites / Co-Requisites
Graduate standing in engineering and/or neuroscience or undergraduate senior standing with consent of instructor.

Course Objectives
The student will be able to describe the techniques for characterization of neural circuits and systems, and explain the principles of neurotechnology for interfacing with biological neural systems.

Materials and Supply Fees
N/A

Required Textbooks and Software
• None- Review articles provided by instructor

Recommended Materials
• Title: Statistical Signal Processing for Neuroscience & Neurotechnology
  Author: Oweiss
  Publication date and edition: 1st edition, 2010
  ISBN number: 9780123750273

• Title: Principles of Neural Science (PNS)
  Author: Kandel, Schwartz, Jessel, Siegelbaum, and Hudspeth
  ISBN number: 9780071390118

• Title: Theoretical Neuroscience (TNS)
  Author: Dayan Peter and Abbott, L.
  Publication date and edition 2001
  ISBN: 978026262318723

• Title: Cellular Biophysics, Vol 2 (CBP)
  Author: Thomas Weiss
  ISBN 0-262-23184-0 (v.2)
Course Schedule

Week 1: Excitable cells, ion channels, synapses, neurotransmitters & receptors/Oweiss/PNS Ch 4-5, CBP ch.1
Week 2: Deterministic Neural Models/Oweiss/ PNS ch. 6; CBP ch. 2-3/HW 1 due
Week 3: Neural Encoding/Oweiss/TNS ch. 1-2; SSPNT ch.3, 6-7/HW 2 due
Week 4: Neural Decoding/Oweiss/SSPNT ch. 2-5, TNS ch. 3/HW 3 due
Week 5: Neural Control: State Space and feedback control/Oweiss/in Class material/Quiz 1
Week 6: Neurotechnology: microelectrodes and microsystems/Oweiss/in Class material/ HW 4 due
Week 7: Fluorescent imaging of genetically encoded indicators/Oweiss/in Class material/Mini project 1
Week 8: Electrical and Optogenetic Neurostimulation and Neuromodulation/Oweiss/in Class material/Project Pre
proposals
Week 9: Neural Systems: Sensory systems/Oweiss/PNS Part V/ Quiz 2
Week 10: Neural Systems: Motor systems/Oweiss/ PNS Part VI/Mini project 2
Week 11: Neural Systems: Cognitive systems/Oweiss/PNS Part VI/
Week 12: Neural Interfaces: Sensory Prosthesis/Oweiss/ in Class material/ Project Proposal
Week 13: Neural Interfaces: Motor Prosthesis/Oweiss/in Class material/ Quiz 3
Week 14: Neural Interfaces: Cognitive and Memory Prosthesis/Oweiss/SSPNT ch.5
Week 15: Clinical Applications: Bi-directional Interfaces for Movement Disorders and Impairment; Consumer
Applications: Neuromorphic systems, Artificial Intelligence and Neurotechnology Ventures/Oweiss/in Class
material/project previews
Week 16: Final project presentation

Attendance Policy, Class Expectations, and Make-Up Policy

Attendance is required as a considerable portion of your grade depends on class participation and discussion. Because the class covers a multi-disciplinary topic, questions and discussions during class are strongly encouraged. You will need to notify me ahead of time if you will not attend class and provide a reasonable written explanation of your absence. I will record attendance randomly throughout the semester. You need 75% attendance to PASS the class.

Cell phones and other electronic devices are to be silenced. No text messaging during class or exams.

Requirements for class attendance and make-up exams, assignments, and other work in this course are consistent with university policies that can be found in the online catalog at:

Evaluation of Grades

Guidelines and Format
1) Mini-projects and homework guidelines
There will be four homework assignments distributed evenly throughout the semester. Some of these will make use of MATLAB®. There will be TWO mini-projects worth 12.5% each. Data for these mini-projects will be provided by the instructor. There will be 3 quizzes in class regarding reading assignments.

2) Final Project Guidelines
   a) The Pre-proposal:
      Write a brief description of the research topic that you plan to pursue for your project/term paper, as well as the specific problems or questions you plan to address in your proposal. You will be provided with guidelines and resources on how to gain access to data to be used for your project.
      Limit: 2 pages, 12-pt font size, 1.5-line spacing (no references), font type: Arial, one-inch margins.

Neural Signals, Systems and Technology, EEL 5XXX
Karim Oweiss and TERM YEAR
b) The Proposal:
Based on the feedback I give you on your pre-proposal, write a proposal that should attract “funding” (aka a good grade) from your “sponsor” (instructor). Your proposal should include:
   a) Background and Significance
   b) Preliminary studies (if any) or relevant work
   c) Research Design and Methods
   d) Timeline
You should introduce the area of investigation, explain the “big picture” or significance of the specific problem that you will tackle, provide a list of the particular questions you intend to address in your experiments/simulation, and the methods you will use to conduct these experiments/simulation. It is very important to include all the details about how the data you will be working with has been/will be collected. Limit: 4 pages (not including references), Single spacing, one-inch margins, 12-pt font size Arial font.

c) The Final report:
Based on the actual implementation of the proposal, write a concise, yet detailed summary of all your experimental findings in the form of a final report. A key element of this report is your discussion section and how it relates to topics learned in class and challenges specific to the problem you addressed in your project. Limit: 8 pages (not including references or figures), Single spacing, one-inch margins, 12-pt Arial font.

More information on UF grading policy may be found at:
https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx

Students Requiring Accommodations
Students with disabilities requesting accommodations should first register with the Disability Resource Center (352-392-8565, https://www.dso.ufl.edu/drc) by providing appropriate documentation. Once registered, students will receive an accommodation letter which must be presented to the instructor when requesting accommodation. Students with disabilities should follow this procedure as early as possible in the semester.

Course Evaluation
Students are expected to provide feedback on the quality of instruction in this course by completing online evaluations at https://evaluations.ufl.edu/evals. Evaluations are typically open during the last two or three weeks of the semester, but students will be given specific times when they are open. Summary results of these assessments are available to students at https://evaluations.ufl.edu/results/.

University Honesty Policy
UF students are bound by The Honor Pledge which states, "We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honor and integrity by abiding by the Honor Code."
On all work submitted for credit by students at the University of Florida, the following pledge is either required or implied: “On my honor, I have neither given nor received unauthorized aid in doing this assignment.” The Honor Code ([https://www.dso.ufl.edu/sccr/process/student-conduct-honor-code/](https://www.dso.ufl.edu/sccr/process/student-conduct-honor-code/)) specifies a number of behaviors that are in violation of this code and the possible sanctions. Furthermore, you are obligated to report any condition that facilitates academic misconduct to appropriate personnel. If you have any questions or concerns, please consult with the instructor or TAs in this class.

**Software Use**

All faculty, staff and student of the University are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal penalties for the individual violator. Because such violations are also against University policies and rules, disciplinary action will be taken as appropriate. We, the members of the University of Florida community, pledge to uphold ourselves and our peers to the highest standards of honesty and integrity.
