

EEL 6935 CAD for Hardware Security Validation

Class periods: Tuesdays, Periods 10, 5:10 PM – 6:00 PM

Thursdays, Period 10-11, 5:10 PM – 7:05 PM

Location: WEIL0273

Academic Term: Spring 2022

Instructor:

Dr. Farimah Farahmandi

farimah@ece.ufl.edu

352-392-0910

Office Hours: Mondays and Wednesday (2-3 pm)

Teaching Assistants:

Please contact through the Canvas website

- Avinash Ayalasomayajula (ayalasomayajul.a@ufl.edu, Office Hours: TBD)

Course Description:

Catalog description: **Credits 3;**

The course will provide an overview of the SoC design flow for FPGA and ASIC designs. Moreover, it teaches various hardware verification/validation techniques (e.g., simulation-based validation, formal methods, and hybrid approaches) using several computer-aided design (CAD) tools in pre- and post-silicon stages. The course also outlines the challenges in hardware security verification/validation and overview various techniques/tools to detect information leakage, side-channel leakage, malicious modifications, fault-injection attacks, and intellectual property (IP) piracy.

Hardware Validation and Verification, Hardware Security, CAD tools, Formal Methods, Simulation-based Validation, and Test Generation.

Course Pre-Requisites / Co-Requisites:

Co-requisites with Introduction to Hardware Security and Computer Architecture. Students are expected to have a general background in Digital Design also be experienced with Verilog/VHDL programming. Students can bypass co-requisites with permissions.

Course Objectives:

Hardware Validation is a major bottleneck such that more than 70% of design efforts are dedicated to verification and validation efforts in pre-silicon and post-silicon stages.

Verification/validation has several objectives, such as ensuring correct functionality, timing, reliability, security and trust assurance, etc. Security validation/verification is critical since it aims to detect any intentional/unintentional security vulnerabilities that lead to the leakage of sensitive information in design as well as the denial of service. Security validation is challenging due to the stealthy nature of potential attacks, as well as the diverse nature of vulnerabilities in system-on-chip (SoC) designs. This course will teach various design and verification techniques for hardware designs using existing techniques and methodologies in different stages of a design life-cycle as well as various abstraction levels (e.g., high-level C/C++, register transfer level, gate-level, and layout level). The challenges and limitations of each of the techniques will also be discussed. In the second half of the design, the discussed techniques and tools will be used to

identify the design weaknesses that cause the security vulnerabilities (e.g., information leakage, side-channel leakage, fault-injection attacks, malicious modifications, and IP piracy) in various case studies. We will use commercial CAD tools and academic techniques to detect such vulnerabilities in SoC designs. Some countermeasures also will be discussed.

Upon the completion of the course, students should have a good understanding of the following topics:

SoC Design Flow (FPGA and ASIC)

Verification/validation techniques

Verification/validation objectives, tools, metrics, and benchmarks

- Pre-silicon Validation approaches
- Post-silicon validation approaches

Why is Security Validation needed? (1 week)

- Security Verification challenges
- Threat models
- Trust/security metrics and benchmarks

CAD for Security Assessment and countermeasures

- Information leakage (high-level, RTL, gate-level)
- Side-channel leakage (high-level, RTL, gate-level, layout)
- Fault injection attacks (high-level, RTL, gate-level)
- Malicious modifications (high-level, RTL, gate-level, layout)
- IP Piracy (bitstream protection/ tampering analysis, and Reverse engineering)

Materials and Supply Fees

None

Equipment

None

Required Textbooks and Software

- **Textbook:** No textbook. Relevant research papers, slides, and other notes will be provided in class.
- **Software:** Xilinx ISE package, Synopsys Verilog simulation package and Formal Tools, Cadence Design System, Programming and Scripting Software (Matlab, Python, C/C++)

Course Schedule

Week	Topics	Notes
1, 2	SoC Design Flow for ASIC and FPGA	Course Intro, Design Integration, Synthesis, Design for test and debug insertion, Layout Extraction, Manufacturing, ...
3, 4	Verification/validation Objectives	<ul style="list-style-type: none"> - Timing, functionality, design constraints (power, energy, area), security, reliability - Verification benchmarks
5, 6, 7	Pre-silicon Validation	<ul style="list-style-type: none"> - Metrics - Simulation-based validation techniques (random test generation, directed test generation, constraint-random tests, UVM/OVM) + tools - Formal methods (equivalence checking, model checking, theorem proving, satisfiability problems) + tools - Statistical approaches + tools - Machine learning based approaches - Assignment 1 Due Week 6
8	Post-silicon Validation	<ul style="list-style-type: none"> - Metrics - Design for test + tools - Design for debug + tools - Machine learning based approaches - Assignment 2 Due Week 8
9	Why is security validation needed?	<ul style="list-style-type: none"> - Security Verification challenges - Threat models - Trust/security metrics and benchmarks - Intro to CAD for Security Assessment and countermeasures
10, 11	Information leakage	<ul style="list-style-type: none"> - Tools (E.g., Vivado and Catapult), - Abstraction levels high-level (C/C++), RTL, gate-level - Sample countermeasures - Student in class presentations
12,13	Side-channel leakage Malicious Modifications	<ul style="list-style-type: none"> - Tools, Abstraction levels high-level (C/C++), RTL, gate-level, layout-level - Sample countermeasures - Student in class presentations
14, 15	Fault-injection Attacks Reverse Engineering	<ul style="list-style-type: none"> - Tools, Abstraction levels high-level (C/C++), RTL, gate-level, layout-level - Sample countermeasures - Obfuscation, bitstream protection and tampering analysis, ...

		- <i>Student in class presentations</i>
16	Exam1 & Final Reports	-

Attendance Policy, Class Expectations, and Make-Up Policy

On-time attendance in the class is mandatory. There are no make-up exams/quizzes unless there is an acceptable reason (illness, serious family emergencies, UF-imposed curriculum requirement or activity, religious holiday, or jury duty). In those cases, a make-up exam will be organized. Students should contact the instructor ahead of the exam so that an alternate exam schedule can be found. Students missing exams for unpredictable family or medical reasons should notify the instructor ahead of the exam time. If you miss more than one test, you will need to contact the instructor to evaluate whether you should pursue the class further or receive an incomplete. Students missing an exam without giving advance notice to the instructor, or without providing a valid (documented) reason, will receive a grade of F for this exam. Make-up will not be given for computer assignments. If you believe that you have a valid exam conflict, please send the information at least eight days in advance to the instructor. Please specify the times of your conflict and then times immediately before or after the scheduled exam time when you are available.

To ensure a classroom environment conducive to success for everyone, please turn off all cell phones before class starts. If you must enter the classroom late, be considerate, and be as quiet as possible. Persistent disruptive behavior will result in grade deductions.

All use of electronic devices during an exam will be considered a violation of the student honor code (i.e., cheating). Laptop computer and tablets are welcome in class as long as they are used for class-related work. Surfing the web, checking email, making posts, etc., is strictly prohibited.

Evaluation of Grades

Assignment	Total Points	Percentage of Final Grade
Final Exam	100	30%
Assignments (individual)	100 each	20%
In class presentation (team work)	100	20%
Final Paper Report (team work)	100	30%

The class presentation will be assigned by the instructor to teams of two students. Each team will be required to give a 45 minutes presentation on 3~5 papers on various hardware security validation/verification techniques that have been assigned to them. A 15 minutes Q&A will follow the presentation. The presentations will be graded based on the understanding of each of the students of the topic (50%), the ability to summarize the contributions of the papers and point to their limitations and challenges (30%), and the ability to answer questions during Q&A (20%). Each team member will be

graded individually for the part that they present, and the ability to answer the questions (50% of overall presentation grade). The students will be evaluated as a team for the quality of the slides and the overall presentation (50% of overall presentation grade).

The same team should write a final report on the presented papers. The students are expected to write a high-quality survey paper on the defined topic and assigned papers. The students are expected to look for other related papers and methods and include them in their reports. The report should contain:

- (i) a comprehensive discussion on the motivation, related work, and background of the topic of research (20%);
- (ii) a complete discussion on the technical details of reviewed approaches (25%);
- (iii) a detailed comparison between reviewed approaches with stating their pros and cons as well as their limitation, correctness, and applicability of their results (25%);
- (iv) the implementation the result of one of the reviewed methods (performed by the team members) (20%);
- (v) conclusion and a discussion on the future possible directions (10%).

Each member should write a separate section in parts (iii) and (ii). The report should contain information on the contributions of each team member. Each team member will be graded as a team for parts i, iv, and v and individually for parts ii and iii.

Grading Policy

You will receive numerical grades for your quizzes and exams. The final grade will be determined primarily by the curve. The break between “B” and “B-” will be approximately set at the average of total scores of students with a score of %50 or more. Letter grades will be monotonic in the total course scores. Your grade will be solely based on your performance in the course and not on outside factors such as your wish to graduate this semester or the possibility of losing a scholarship.

In order to graduate, graduate students must have an overall GPA and a major GPA of 3.0 or better (B or better). Note: A “B-” average is equivalent to a GPA of 2.67, and therefore, it does not satisfy this graduation requirement. More information on UF grading policy may be found at: <https://catalog.ufl.edu/graduate/regulations/>

The following grading scale is subject to change

Percent	Grade	Grade Points
93- 100	A	4.00
89 - 92.9	A-	3.67
84 - 88.9	B+	3.33
81 - 83.9	B	3.00
78 - 80.9	B-	2.67
74 - 77.9	C+	2.33
71 - 73.9	C	2.00
65.0 - 70.9	C-	1.67
63 - 65.9	D+	1.33
60 - 62.9	D	1.00
58 - 59.9	D-	0.67
0 - 57.9	E	0.00

Students Requiring Accommodations

Students with disabilities who experience learning barriers and would like to request academic accommodations should connect with the disability Resource Center by visiting <https://disability.ufl.edu/students/get-started/>. It is important for students to share their accommodation letter with their instructor and discuss their access needs, as early as possible in the semester.

Course Evaluation

Students are expected to provide professional and respectful feedback on the quality of instruction in this course by completing course evaluations online via GatorEvals. Guidance on how to give feedback in a professional and respectful manner is available at <https://gatorevals.aa.ufl.edu/students/>. Students will be notified when the evaluation period opens, and can complete evaluations through the email they receive from GatorEvals, in their Canvas course menu under GatorEvals, or via <https://ufl.bluera.com/ufl/>. Summaries of course evaluation results are available to students at <https://gatorevals.aa.ufl.edu/public-results/>.

In-Class Recording

Students are allowed to record video or audio of class lectures. However, the purposes for which these recordings may be used are strictly controlled. The only allowable purposes are (1) for personal educational use, (2) in connection with a complaint to the university, or (3) as evidence in, or in preparation for, a criminal or civil proceeding. All other purposes are prohibited. Specifically, students may not publish recorded lectures without the written consent of the instructor.

A “class lecture” is an educational presentation intended to inform or teach enrolled students about a particular subject, including any instructor-led discussions that form part of the presentation, and delivered by any instructor hired or appointed by the University, or by a guest instructor, as part of a University of Florida course. A class lecture does not include lab sessions, student presentations, clinical presentations such as patient history, academic exercises involving solely student participation, assessments (quizzes, tests, exams), field trips, private conversations between students in the class or between a student and the faculty or lecturer during a class session.

Publication without permission of the instructor is prohibited. To “publish” means to share, transmit, circulate, distribute, or provide access to a recording, regardless of format or medium, to another person (or persons), including but not limited to another student within the same class section. Additionally, a recording, or transcript of a recording, is considered published if it is posted on or uploaded to, in whole or in part, any media platform, including but not limited to social media, book, magazine, newspaper, leaflet, or third party note/tutoring services. A student who publishes a recording without written consent may be subject to a civil cause of action instituted by a person injured by the publication and/or discipline under UF Regulation 4.040 Student Honor Code and Student Conduct Code.

University Honesty Policy

UF students are bound by The Honor Pledge which states, “We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honor and integrity by abiding by the Honor Code. On all work submitted for credit by students at the

University of Florida, the following pledge is either required or implied: “On my honor, I have neither given nor received unauthorized aid in doing this assignment.” The Conduct Code (<https://sccr.dso.ufl.edu/process/student-conduct-code/>) specifies a number of behaviors that are in violation of this code and the possible sanctions. If you have any questions or concerns, please consult with the instructor or TAs in this class.

Commitment to a Safe and Inclusive Learning Environment

The Herbert Wertheim College of Engineering values broad diversity within our community and is committed to individual and group empowerment, inclusion, and the elimination of discrimination. It is expected that every person in this class will treat one another with dignity and respect regardless of gender, sexuality, disability, age, socioeconomic status, ethnicity, race, and culture.

If you feel like your performance in class is being impacted by discrimination or harassment of any kind, please contact your instructor or any of the following:

- Your academic advisor or Graduate Program Coordinator
- Jennifer Nappo, Director of Human Resources, 352-392-0904, jpennacc@ufl.edu
- Curtis Taylor, Associate Dean of Student Affairs, 352-392-2177, taylor@eng.ufl.edu
- Toshikazu Nishida, Associate Dean of Academic Affairs, 352-392-0943, nishida@eng.ufl.edu

Software Use

All faculty, staff, and students of the University are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal penalties for the individual violator. Because such violations are also against University policies and rules, disciplinary action will be taken as appropriate. We, the members of the University of Florida community, pledge to uphold ourselves and our peers to the highest standards of honesty and integrity.

Student Privacy

There are federal laws protecting your privacy with regards to grades earned in courses and on individual assignments. For more information, please see: <https://registrar.ufl.edu/ferpa.html>

Campus Resources:

Health and Wellness

Covid-19 Protocols:

- You are expected to wear approved face coverings at all times during class and within buildings even if you are vaccinated. Please continue to follow healthy habits, including best practices like frequent hand washing. Following these practices is our responsibility as Gators.
- If you are sick, stay home and self-quarantine. Please visit the UF Health Screen, Test & Protect website about next steps, retake the questionnaire and schedule your test for no sooner than 24 hours after your symptoms began. Please call your primary care provider if you are ill and need immediate care or the UF Student Health Care Center at 352-392-1161 (or email covid@shcc.ufl.edu) to be evaluated for testing and to receive further instructions about returning to campus. UF Health Screen, Test & Protect offers guidance when you are sick, have been exposed to someone who has tested positive or have tested positive yourself. Visit the [UF Health Screen, Test & Protect website](#) for more information.

U Matter, We Care:

Your well-being is important to the University of Florida. The U Matter, We Care initiative is committed to creating a culture of care on our campus by encouraging members of our community to look out for one another and to reach out for help if a member of our community is in need. If you or a friend is in distress, please contact umatter@ufl.edu so that the U Matter, We Care Team can reach out to the student in distress. A nighttime and weekend crisis counselor is available by phone at 352-392-1575. The U Matter, We Care Team can help connect students to the many other helping resources available including, but not limited to, Victim Advocates, Housing staff, and the Counseling and Wellness Center. Please remember that asking for help is a sign of strength. In case of emergency, call 9-1-1.

Counseling and Wellness Center: <https://counseling.ufl.edu>, and 392-1575; and the University Police Department: 392-1111 or 9-1-1 for emergencies.

Sexual Discrimination, Harassment, Assault, or Violence

If you or a friend has been subjected to sexual discrimination, sexual harassment, sexual assault, or violence contact the **Office of Title IX Compliance**, located at Yon Hall Room 427, 1908 Stadium Road, (352) 273-1094, title-ix@ufl.edu

Sexual Assault Recovery Services (SARS)

Student Health Care Center, 392-1161.

University Police Department at 392-1111 (or 9-1-1 for emergencies), or <http://www.police.ufl.edu/>.

Academic Resources

E-learning technical support, 352-392-4357 (select option 2) or e-mail to Learning-support@ufl.edu. <https://lss.at.ufl.edu/help.shtml>.
